

**Saskatchewan Onsite Wastewater  
MANAGEMENT ASSOCIATION**

**February 2, 2012**

## **Convention Schedule Finalized**

The convention and trade show schedule has now been finalized. There is still time to register for the entire event, or just pop into the trade show and check out the booths.

The following Schedule of Events will help you to plan your day. Don't miss out on this opportunity to network with your fellow stakeholders, hear what is happening from a regulatory standpoint and increase your knowledge and understanding of soils and other techniques and technologies.

Saskatchewan showed the highest economic growth in Canada during the last fiscal quarter and that trend will continue through 2012 as the resource industries in the province continue to expand. That growth will lead to higher housing starts in rural areas, which means business for onsite wastewater contractors.

New developments in rural areas may fall under the subdivision development guideline. Angus Chu will explain the cumulative effects of higher density developments in rural areas.

More sophisticated systems are costly and homeowners have not yet caught up with the pricing for larger more complex systems. Convention is your chance to discuss ways to explain and sell the right system for the site to your client to combat "sticker shock".

The day will culminate in the Annual General Meeting followed by a banquet.

Registration information is available online. Lunch and coffee will be provided. The trade show is open to anyone interested. Call us or go online for more information.

**Participate in the growth of the industry in Saskatchewan by attending this event.  
Conference and Trade Show, February 10, Radisson, Saskatoon**

### **Upcoming Training for Onsite Wastewater Practitioner**

**Regina                      March 14, 15 & 16, 2012                      Days 1—3                      March 28, 29 & 30, 2012                      Days 4—6**
